Profile

2016 Software Engineering graduate of Rochester Institute of Technology with years of leadership experience in the Air Force. Excels at C#, Java, JavaScript, Ruby, Visual Basic, Python, C++, and C application development, and always willing to learn.

Education

Rochester Institute of Technology - 2011-2016

Rochester, NY | 3.85 GPA | Bachelor of Science in Software Engineering | Minor in Military Sciences | Immersion in Arabic

Skills

Programming Languages:	C#, Java, JavaScript, Ruby, Visual Basic, Python, C++, C, HTML, CSS
Operating Systems:	Windows, Linux, Mac OS X
Development Software:	Microsoft Visual Studio, Eclipse, Android Studio, Microsoft Visio
Software:	Microsoft Office Suite, Microsoft Power BI

Projects

- Worked in free time on a project with a group of interns to explore people's stories through the use of personable "explorers" that prompt for videos, photos, and audio inputs. This project, called Project Atlas, used lights and sounds driven by a windows phone with additional hardware to help the bots "survive" when out in the world.
- Implemented a new interface for class search and enrollment written in Angular.js as part of the Student IT Office, working with external customers around campus as well as the Information Technology Services department.
- Created a Universal Windows Application for watching live internet television called Kiwi TV. This project was launched in the Windows Store in April of 2016, and has been in development since.

Experience

Defense Innovation Unit Experimental, Mountain View California

Web Developer | September 2016 – Present
